## **IHI has shipped 1,000th TRE series centrifugal compressor from Tatsuno**

IHI has shipped 1,000th TRE series centrifugal compressor manufactured in Tatsuno factory located in Nagano prefecture, Japan. This TRE series centrifugal compressor was launched in 2001, its motor output range is 375-950kW(502-1274hp).

The 1,000th TRE series centrifugal compressor has been delivered to AISIN KEIKINZOKU Co.,Ltd., which is one of the leading Japanese companies in the field of die-cast products and extrusion products and also a member of TOYOTA group. IHI has delivered a number of TRE series centrifugal compressor to the said company, and due to the proven performance and reliability, IHI has delivered TRE series centrifugal compressor again.

IHI has been a leading compressor manufacturer since the development of the first reciprocating compressor in 1892. Especially, IHI's internationally renowned rotating machinery technologies, which have been similarly applied in different fields such as jet engines and turbo chargers, has enabled IHI to develop the centrifugal compressors with high performance and reliability. Thanks to this integration of technology, IHI has been providing customer benefits such as user customization, energy saving and lower maintenance to the various industries. Since 1970, IHI has delivered over 8,000 centrifugal compressors to global market.

IHI has agreed to establish a joint venture company in October 2016 for the manufacturing and supply of centrifugal compressors with DALGAKIRAN MAKINA SAN. VE TIC. A.S, one of leading compressor manufactures in Turkey. Additionally, IHI has established a joint venture company, IHI-Sullair Compression Technology (Suzhou) Co., Ltd in Jiangsu province, China in 2006. The factories located in 3 regions, Japan, China and Turkey will boost IHI's global manufacturing competitiveness and maximize customer satisfaction.
