

Corporate Profile

IHI Corporation

Realize your dreams

At IHI Group, we design and build progressive engineering solutions for people and planet.

Our heritage is built upon a shared culture of striving for the highest standards in every facet of our business. This approach commits all relationships to our management philosophy of contributing to the development of society through technology.

We work alongside customers, stakeholders and fellow employees to deliver outcomes that positively affect the world and its inhabitants.

This powers our relationships to greater outcomes, and also makes good commercial sense. At our core, we are people who apply forward thinking to find lasting solutions to the toughest problems.

IHI Group. Realize your dreams.

Management message

Seeking to become a more trusted corporate group by strengthening our earnings foundations

It is a pleasure to overview the activities of the IHI Group, which I am honored to lead.

President and Chief Executive Officer
Tsugio Mitsuoka

IHI was established as Ishikawajima Shipyard in 1853. We have since evolved into a comprehensive heavy industry manufacturer that can contribute to social progress by relentlessly pursuing technological excellence and by cultivating advanced engineering capabilities.

Accommodating Diverse Needs

The global business landscape is transforming at lightning speed. The global economy has become increasingly more complicated as the economic climates of emerging nations have diversified, international economic partnerships have progressed, and as the industrial structure has changed. Swift progress in information technology has made it even more important to be innovative in our products and services offering, while incorporating information and communication technologies that keep pace with advancements in manufacturing. Social infrastructure demands are diversifying around the globe. The focus for emerging nations is to tackle urbanization and industrialization. The priorities for developed countries include addressing the challenges of population decline and aging infrastructure. It is more important than ever for IHI to identify and cater to the diversifying customer value requirements that stem from such transformations in our operating climate.

Initiatives to strengthen our earnings foundations

It was against this backdrop that we launched Group Management Policies 2016. Through this initiative, we seek to create a structure to reinforce business strategy implementation and ensure consistent profitability in construction. We also aim to supply solutions that create customer value and deliver advanced products and services so we can strengthen our earnings foundations. We are therefore prioritizing the following three initiatives in our drive toward tomorrow:

- Accelerate business concentration and selection by undertaking new portfolio management approaches to clarify the direction of business strategies
- Enhance estimate processes and risk reviews as part of efforts to strengthen the project implementation structure, creating a setup that enables us to stabilize earnings
- Employ shared Group functions that we reinforce by concentrating resources and integrating capabilities, thereby transforming our business model while making our operations more competitive

Realize your dreams

Our management principles are “Contribute to the development of society through technology” and “Human resources are our single most valuable asset”. Our corporate message of “Realize your dreams” epitomizes the mission we embarked on more than 160 years ago to leverage our technology and human resources to help humankind’s greatest dreams come true.

We look forward to your ongoing support and encouragement as the IHI Group endeavors to fulfill its mission by growing sustainably and enhancing corporate value while building trust among all of its stakeholders.

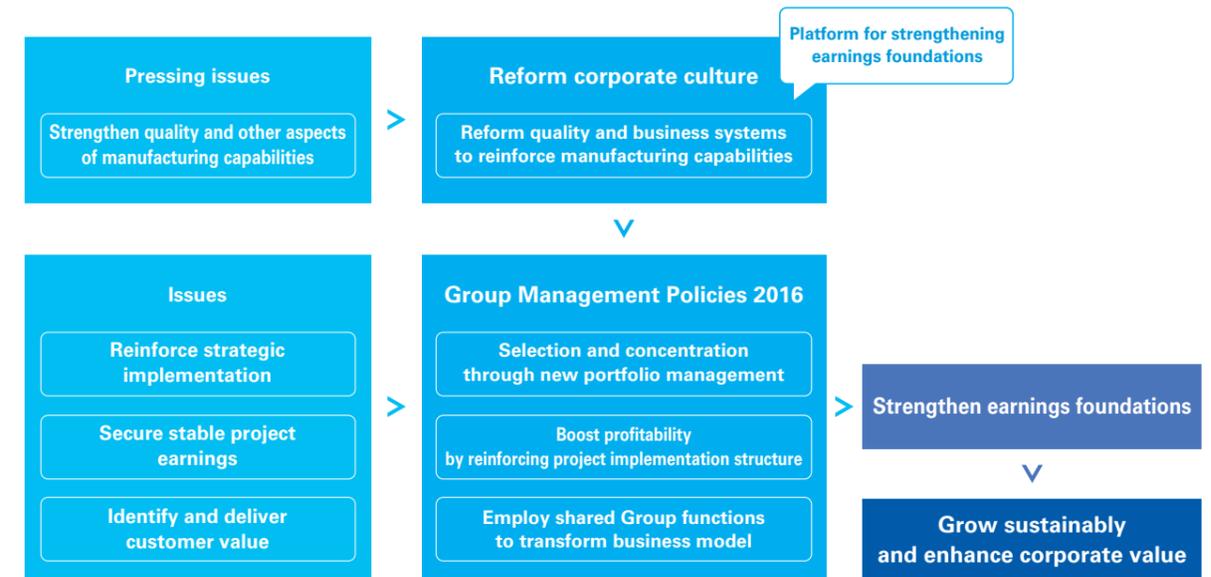

Positioning of Group Management Policies 2016

IHI Group Vision

The IHI Group seeks to solve the various environmental, industrial, social, and energy related problems of the 21st century, through using engineering expertise to focus on “Monozukuri” technology. In striving towards these goals, IHI is becoming a global enterprise offering the safety and security for the benefit of both the environment and humanity.

Overview of Group Management Policies 2016

* For details about Group Management Policies 2016, refer to “About IHI > Management Policy > Group Management Policy” on the IHI website.

Business Areas

Resources, Energy & Environment Business Area

Minimizing Environmental Impact

We maintain stable supplies of energy that are essential to industrial progress and comfortable lifestyles while aiming to minimize global warming. We leverage our expertise and proprietary technologies in coal, natural gas, nuclear power, and in renewables to optimize product and service mixes while minimally affecting the environment.

- Boilers
- Power system plants
- Large power systems
- Power systems for land and marine use
- Process plants
- Pharmaceutical plants
- Environmental response systems
- Nuclear energy
- Asian base EPC

● Large-scale tower type boiler
(Photo is provided by J-POWER (EPDC))

Social Infrastructure & Offshore Facilities Business Area

Underpinning the Essentials of Modern Living

In social infrastructure, security, offshore and urban development, as well as in other fields, we leverage our technological capabilities and experience to ensure that nations and societies are safer and more secure.

- Bridges and watergates
- Shield systems
- Concrete construction materials
- Transport systems
- Urban development
- F-LNG

● Osman Gazi Bridge across Izmit Bay

Industrial Systems & General-Purpose Machinery Business Area

Transforming the World's Industrial Infrastructure

We offer innovative systems/technologies and optimal solutions to help transform industrial infrastructure around the world. We are helping companies enhance manufacturing processes and create more sophisticated products so they can continue to satisfy their customers in the years ahead.

- Rotating machinery
- Turbochargers for vehicles
- Heat treatment and surface engineering
- Agricultural machinery and small power systems
- Transport machinery
- Parking
- Logistics and machinery

● Turbochargers for vehicles

Aero Engine, Space & Defense Business Area

Opening New Horizons

We draw on world-class technologies and organizational strengths to help make air travel more comfortable and safer and better for the environment while expanding space exploration to benefit humankind.

- Aircraft engines
- Defense equipment and systems
- Rocket systems and space exploration

● GEnx turbofan engine

Shared Group Functions

IHI has four business areas, namely Resources, Energy & Environment Business Area; Social Infrastructure & Offshore Facilities Business Area; Industrial Systems & General-Purpose Machinery Business Area; and Aero Engine, Space & Defense Business Area. Its three shared Group functions are solution & engineering, intelligent information management, and global marketing. We will properly identify diversifying customer value and strengthen collaboration on shared Group functions while both business operation divisions and the shared Group functions co-create values to accelerate a transformation of our business model and create customer value.

Solution & Engineering

The solution & engineering shared function has enabled us to package products, services, technologies, and other resources from all areas of the IHI Group to extend the value chain for our customers by offering them innovative solutions to their needs.

Intelligent Information Management

The intelligent information management shared function contributes to the growth of all business units by embedding information and communications technology in their products and services.

This headquarters can leverage such technology to gather and analyze product operations, maintenance, environmental, and other data to create more advanced offerings that employ predictive diagnostics and match customer business model requirements.

Global Marketing

The global marketing shared function plays three key roles in accelerating the globalization of the IHI Group. The first is to expand locally oriented businesses to help multinational customers. The second is to ensure that regional businesses operate nimbly without compromising governance. The third is to cultivate people who embrace the challenges and opportunities of an interconnected world. We are conducting these activities first mainly in the regional headquarters covering the Americas, China, and Asia-Pacific countries.

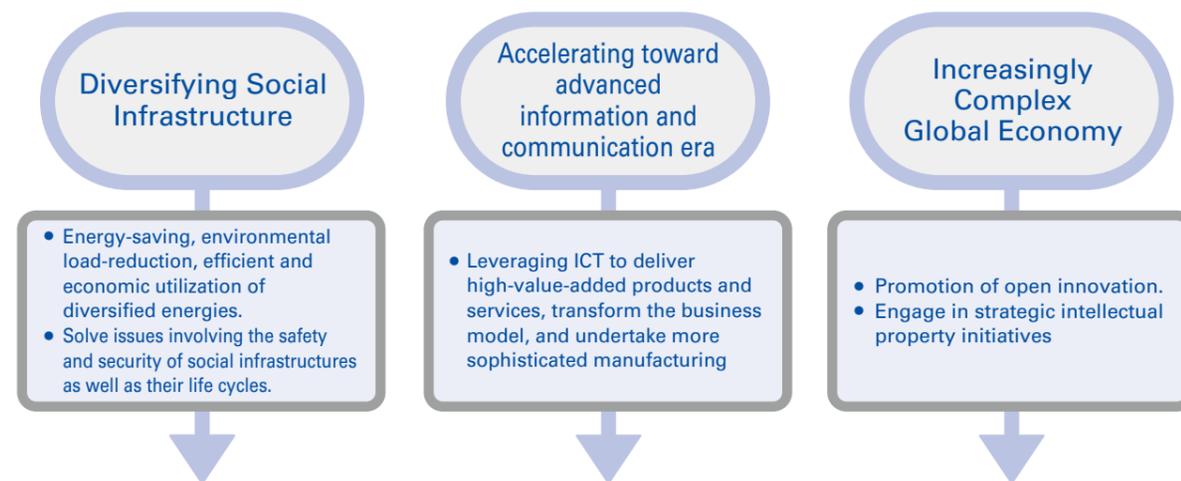

Research and Development

The IHI Group has formulated a clear strategy to develop technologies by drawing on its collective strengths while sharing the medium- to long-term R&D direction throughout the Group.

This strategy focuses R&D based to the three megatrends of “Diversifying Social Infrastructure”, “Accelerating toward advanced information and communication era”, “Increasingly Complex Global Economy”, and also encompasses technological areas that are group-wide priorities.

Social development will be led by the efforts to increase the production efficiency, to reduce the environmental load, and to create new business model using advanced ICT. IHI Group continues to cultivate new contributions to society.

R&D underpins a technology-driven IHI Group.

IHI Group Technology Focus Areas

Applied Technologies to Enhance Products and Services

ICT and Robotics / Energy Management Technology / Numerical Analysis and Optimization Technology / Advanced Manufacturing and Productive Process Innovation Technology / Rotating Machinery Technology / Chemical Process Technology

Fundamental Technologies

Structural Strength Technology / Material Technology / Combustion Technology / Heat and Fluid Technology / Vibration and Machine Element Technology / Welding and Bonding Technology / Control and Electronic Technology

Technology Focuses for the Future

- Developing core technologies and product lines for the hydrogen and ammonia value chains to cater for the needs of a low-carbon society
- Using robotics, the Internet of Things, and artificial intelligence to integrate predictive and learning technologies to materialize smart factories, systems, and societies that optimally accommodate demand and supply, climate change, and production efficiencies

R&D Topics

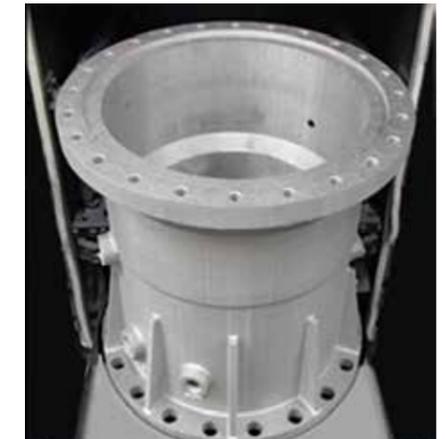

Development of Metal 3D Printing for Production

Metal 3D printing, also known as Additive Manufacturing (AM), is a technology that builds a three-dimensional object, forming successive vertical metal layers by repeatedly melting a metal powder bed using an Electron or Laser beam. This technology widens design flexibility, opening up the availability of more complicated shape that were impossible to

create with the existing technologies, as well as the capability to control the mechanical properties of each part of the object. Moreover, it has the potential to change manufacturing concepts because it enables manufacturing anywhere using a 3D printer, 3D data, and powder.

Vehicular turbocharger part

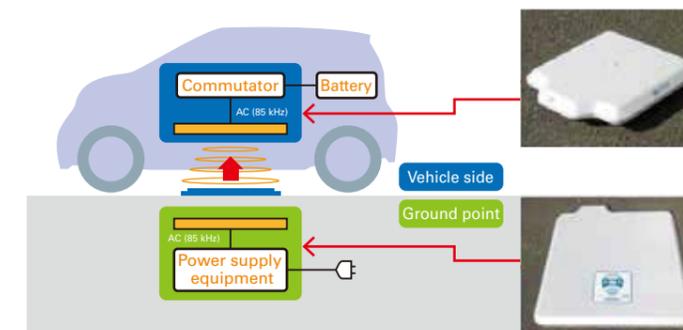

Rocket engine part

Wireless Charging for Electric Vehicles

This technology enables an electric power supply to be conducted without cables. With wireless charging, once you stop a vehicle at a charging spot, charging will start automatically, and there will be no need to connect or disconnect a cable. Thus, you would not get dirty handling the cable. The technology will contribute to the reduction of environmental problems, as environment-friendly electric vehicles

will become more user-friendly and more widely used. Our target is to develop wireless charging devices capable of providing several kW of power by the 2020s, when electric vehicles will be popular. IHI will contribute to realize more comfortable living environment by integrating various technologies including mechanics, electricity, control, electromagnetic field analysis and the mobility-related technologies.

Transmitting electric power using a magnetic field from the ground coil unit to the vehicle coil unit

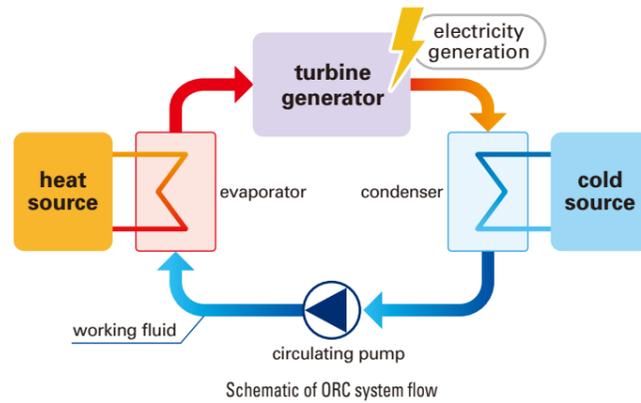

Test at MIDEAS experimental house (Photo courtesy of Mitsui Home Co., Ltd.)

Development of Organic Rankine Cycle (ORC) Power Generation System

Organic Rankine Cycle (ORC) power generation technology can utilize low-grade heat (below 200°C), which was previously impossible to use for power generation. This technology enables the use of industrial waste heat, geothermal energy, and biomass as heat sources for power generation. In addition to the existing ORC system that uses relatively low-temperature heat sources (from 200°C to 120°C), the development of a new ORC

system, which enables the use of significantly lower temperatures of heat source (from 120°C to 80°C), has been completed. IHI is providing solutions/total engineering services for highly efficient and compact-package ORC systems. In addition, we will try to develop an ORC system that enables to use a heat source of even lower temperature (from 80°C to 60°C).

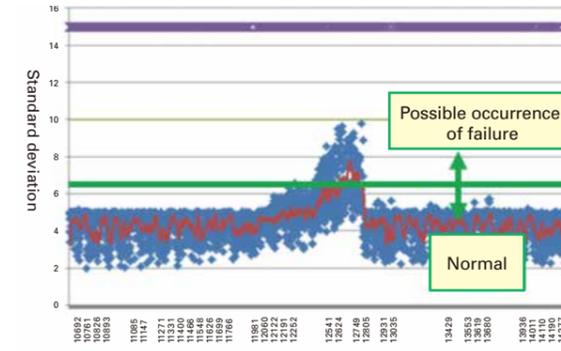

ORC power station using hot springs

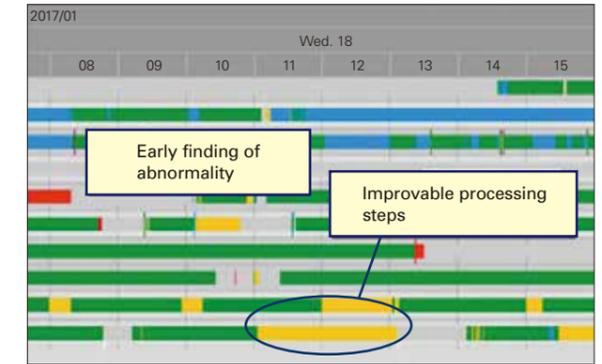

Smart Factory

The IHI group is working on achieving a "smart factory" adapted to enhance factory productivity by fusing manufacturing technology and ICT together. The aims of this are: (1) to quickly grasp disturbance hampering production such as equipment failure to quickly take countermeasures against it; and (2) to improve output per person and equipment/energy utilization efficiency. For example, in a machine factory, by attaching various sensors to processing

equipment to analyze data, the signs of failure can be detected in advance. Also, by attaching IC tags, etc. to various components, processing time and waiting time in each processing step, and who is in charge can be grasped without taking time and effort. Analyzing the resulting data allows us to work on identifying processing steps problematic for improving productivity and on effectively improving them.

Failure prediction based on sensor data

Operating status of each piece of equipment and visualization of problems

Development of Renewable Energy and Hydrogen Energy

To achieve a low-carbon society, it is essential to utilize renewable energies or carbon-free energy such as hydrogen.

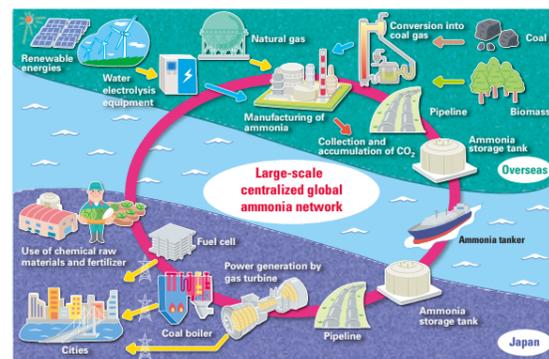

Hydrogen gas does not generate carbon dioxide when it is combusted, but the cost for transportation and storage is rather high because hydrogen gas is difficult to liquefy.

In order to reduce the cost, a 'hydrogen carrier' such as ammonia which includes hydrogen atom inside

and is easy to liquefy will be used.

IHI has focused its attention on ammonia as a hydrogen carrier and is developing technology to make full use of it.

New technology is needed to ensure stable combustion of ammonia in gas turbines or boilers. This technology developed by IHI will serve as a stepping stone towards a low-carbon society.

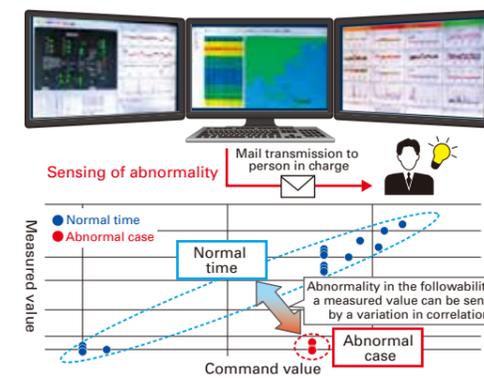

IHI's vision for a future carbon-free energy supply chain

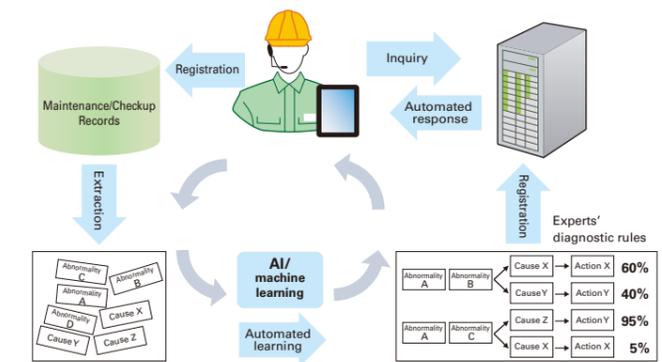

Data analysis technology for utilizing ICT and IoT

The IHI group is advancing the sophistication of our products and services and manufacturing processes by collecting a lot of operating information on products delivered to our customers and on in-house equipment using our shared platform for utilizing ICT and IoT, called ILIPS (IHI group Lifecycle Partner System). We are developing failure sign sensing technology flexibly responding to changes in

operating environment such as seasonal variations and a technology allowing anyone to utilize experts' knowhow using AI/machine learning on the basis of text information such as maintenance records. We are further working on creating customer value, such as planning optimum maintenance/operation and proposing new business.

Failure sign sensing technology

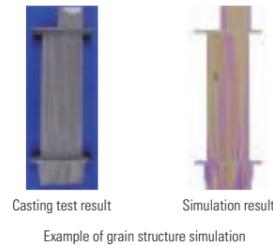

AI-based utilization of experts' knowhow

Technologies Supporting IHI Products

Materials technologies

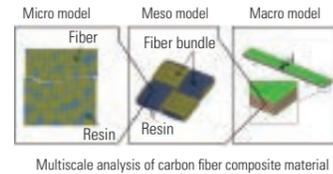

- New material development (light-weight / heat-resistant)
- Casting, forging, and powder metallurgy
- Material structure evaluation
- Strength properties and residual life evaluation
- Environment resistance evaluation
- Evaluation and development of coatings

We are working on developing new materials aiming to reduce weight and improve heat resistance and on developing shaped material processes such as casting, forging, and powder metallurgy. We are also advancing the development of technology for evaluating a material residual life and the understanding of a material deterioration mechanism by the aid of sophisticated analysis equipment.

Vibration engineering and structural strength technologies

- Structural strength evaluation
- Structural test and measurement
- Nonlinear structural analysis
- Impact analysis / composite material analysis
- Steel-concrete evaluation
- Seismic resistance, seismic isolation, and vibration control

In the field of structural strength, structural analysis, and structural vibration technologies, we are working on the research and development of the evaluation of new material strength, new manufacturing processes, high-temperature strength prediction simulation, and also advancing the research and development of seismic resistance, seismic isolation, and vibration control technologies for supporting safety and security.

Rotating machineries and reciprocating engine technology

- Aerodynamic design
- Mechanical vibration and machine elements
- Tribology
- Performance measurement / element test
- Combustion / flow numerical analysis
- Combustion / flow visualization

We are contributing to increasing the efficiency of, improving the reliability of, and reducing the environmental loads of turbochargers, industrial compressors, aero-engines, gas turbines, diesel engines, gas engines, and so on using advanced numerical analysis technology, element test and measurement technology.

Thermal fluid and combustion technologies

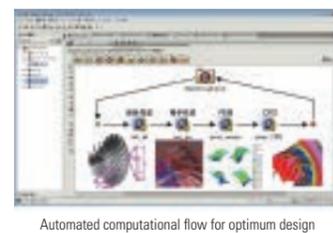

- Heat, fluid, combustion, and wind-tunnel testing
- Numerical analysis of heat transfer, phase change, multiphase flow, and combustion
- Heat and fluid measurement and control
- Next-generation energy

We are improving the performance of various types of equipment and developing new technology using new heat/fluid-related numerical analysis technology and test/measurement/control technologies. We are also focusing on developing next-generation energy technology including hydrogen and renewable energies.

Numerical analysis and optimization technologies

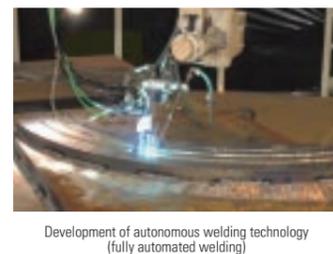

- Optimization
- Machine learning
- Mathematical modeling
- Large-scale parallel computation
- Multiscale analysis
- Multi-physics analysis

We are working on the research and development of a computational engineering method for performing efficient computation while faithfully reproducing a physical phenomenon on a computer, the latest optimization method, data mining based on machine learning, and a mathematical scientific method including mathematical modeling.

Welding and joining technologies

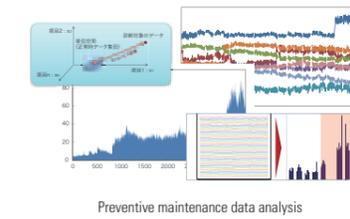

- Arc welding and automation
- Laser processing
- Solid phase joining
- Welding phenomena analysis
- Welding material and structural integrity
- Welding testing and evaluation

We provide a new joining process and new material welding technology to respond to the diversification of products and the adding of value to products. We also employ leading-edge measurement and observation technologies and evaluation methods even for conventional arc welding, and contribute to improving product quality and reliability using an autonomous process.

ICT

- IoT technology
- Big data analysis technology
- AI and machine learning technology
- Sensing technology
- Communication and network technology
- Information security technology

ICT is indispensable for products and services of the IHI group as well as for the sophistication of manufacturing. We analyze a lot of operating data on production equipment and products delivered to customers in accordance with our uniquely developed algorithm to provide new value to customers.

Control and electronics technologies

- Advanced control and optimization
- Embedded software
- Power electronics
- Motor electromagnetic field analysis
- High-speed analog circuit
- Secondary cell application

We are working on control and optimization technologies for taking out the performance of the IHI group's wide range of products to the maximum extent possible, embedded software development for constructing control systems, as well as electric and electronic technologies applied with the latest power electronics, and energy technology.

Mechanical system technologies and robotics

- Special production / FA system
- Undersea and marine instrument design
- Mechanical design for special and clean environments
- Manipulation
- Intelligent and autonomous machinery
- Sensing

We are developing IHI group's production machinery, robot-based FA (factory automation) systems, and undersea and marine instrument on the basis of our mechatronics and system engineering technologies. We are also advancing the research of next-generation robot technology.

Energy and chemical process engineering

- Energy conversion and usage technology
- Catalyst creation and evaluation
- Process simulation
- Chemical reactor and culture apparatus design
- Application technology of algae and microorganisms
- Microbubble applications and water treatment

We deploy energy and chemical processing technologies in fields ranging from plants to manufacturing facilities. We are developing core catalysts for those processes with reactor design technologies, and advanced process optimization technologies, as well as advancing a wide variety of technology development.

Advanced production engineering

- Machining and plastic forming
- Coating, corrosion prevention, surface modification
- Composite material processing
- Non-destructive evaluation and measurement
- Production system

In order to innovate IHI group manufacturing, we are developing various processing technologies indispensable for manufacturing, evaluation and measurement technologies for ensuring quality, and a production system for optimizing the entire production process using the latest ICT technology.

Applied physics and chemistries

- Electromagnetic field application
- Plasma application
- Quantum beam application
- Chemical application
- Functional material invention
- Nano / micro scale analysis and evaluation

We are researching and developing advanced technologies mainly in the fields of applied physics and applied chemistry, which will be useful for developing IHI group's future products and making existing products competitive.

CSR Activities

The IHI Group is committed to meeting the expectations and earning the trust of all stakeholders, from customers, business partners, shareholders, and colleagues to communities everywhere while closely monitoring global issues. In doing so, we seek to deliver more value in the years to come.

CSR Structure

We established a CSR Committee in FY2013 to discuss and promote CSR-related matters, including basic Group policies and measures. The president chairs this committee, with the director in charge of CSR serving as vice chair. Committee members include directors and division heads.

In the years ahead, we will step up efforts to integrate CSR and management in business activities, in keeping with one of our key management principles of contributing to social development through technology.

CSR in Business Activities

The IHI Group helps resolve social issues through monozukuri, the Japanese concept of meticulously planned and executed manufacturing. We developed four strategies to address key social issues, and are undertaking initiatives related to these strategies in each business area to resolve those issues.

Key Issues Addressed by IHI	Business Areas				
	Resources Energy Environment	Social Infrastructure Offshore Facilities	Industrial Systems General-Purpose Machinery	Aero Engine Space Defense	Pushing ahead with new businesses
 <p>Realize low-carbon societies and reduce environmental burdens</p> <ul style="list-style-type: none"> Addressing environmental issues Providing environmentally-friendly products and services 	●	●	●	●	●
 <p>Provide stable energy supplies</p> <ul style="list-style-type: none"> Providing products and technologies that transform diverse energy sources into electricity 	●	●			●
 <p>Responding to industrialization advancement and urbanization</p> <ul style="list-style-type: none"> Enhance urban functions Increase industrial productivity Provide products and technologies that contribute to a safer society Create and enhance manufacturing processes 		●	●	●	●
 <p>Develop medical, food and water solutions</p> <ul style="list-style-type: none"> Providing products and technologies that help address issues relating to medical care, food and water 	●	●	●		●

Environmental Activities

Part of IHI's mission is to reduce the environmental burden of its operations and protect the environment in whatever way possible. In FY2013, we formulated IHI Group Environmental Vision 2013 to guide our environmental efforts through FY2018. We are undertaking environmental initiatives under three-year plans to realize our vision.

IHI Group Environmental Vision 2013 (FY2013 to 2018)

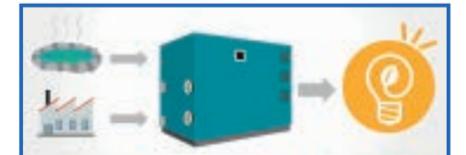

IHI, as a responsible global group, strives to help preserve the global environment on a continuous basis through cooperation with customers and business partners around the world.

Animated video featuring products and services at IHI's EcoPro 2016 booth

Reduce environmental burdens through business activities

The IHI Group provides a range of products and services that help contribute to reduce environmental burdens. We have internally certified offerings with outstanding environmental performance, publicizing them through our website and other channels. We exhibited at EcoPro 2016, Japan's largest environmental exhibition, and showcased products and services that help tackle climate change.

Example of binary power generation

Example of a vehicular turbocharger

Community Service

The IHI Group provides value to society by making employees aware that they are part of society and by extending CSR beyond its operations.

We undertake various community service based on five key themes.

Five key themes

Providing access to medical care, food and water

Nurturing future generations

Resolving problems in local communities

Promoting precision manufacturing and scientific technologies

Supporting environmental sustainability

Supporting Wheelchair Basketball

The IHI Group has been an official sponsor of the Japan Wheelchair Basketball Federation since 2015. We have held wheelchair basketball events for local residents at business sites around the nation, including exhibition match and games for people to experience playing basketball in wheelchairs. We also provide facilities for practice and training camps. We will draw on our headquarters location in Tokyo, host of the 2020 Olympics and Paralympics, to contribute to the success of tournaments and the popularity of wheelchair basketball.

Domestic Network and Main Works

As of March 31, 2017

Soma No. 1 Aero-Engine Works

Site Area	181,673m ²
Products & Services	Parts of jet engines, gas turbines and space development equipment
Certificates	JIS Q 9100 & JIS Q 9001 (ISO 9001), JIS Q 14001 (ISO 14001), JIS Q 27001 (ISO/IEC 27001), Nadcap, Pratt & Whitney LCS

Soma No. 2 Aero-Engine Works

Site Area	192,629m ²
Products & Services	Parts of jet engines, gas turbines and space development equipment
Certificates	JIS Q 9100 & JIS Q 9001 (ISO 9001), JIS Q 14001 (ISO 14001), JIS Q 27001 (ISO/IEC 27001), Nadcap, Pratt & Whitney LCS

Mizuho Aero-Engine Works

Site Area	168,934m ²
Products & Services	Assembly and overhauling of jet engines, gas turbines, space development equipment and defense systems
Certificates	JIS Q 9100 & JIS Q 9001 (ISO 9001), FAA Repair Station, JCAB Repair Station, EASA Maintenance Organization, CAAC Maintenance Organization, ISO 14001, JIS Q 27001:2014 (ISO/IEC 27001:2013), Nadcap

Yokohama Works

Site Area	226,673m ²
Products & Services	Reactor pressure vessels, containment vessels, heat exchangers for nuclear power plants, reactors and towers for chemical plants, steel structures, rotating machinery and other industrial machinery
Certificates	ASME (N, NPT, U, U2, NA, NS, S), ISO 9001, ISO 14001

Aichi Works

Site Area	733,767m ²
Products & Services	Steel structures, offshore structures, LNG tanks (SPB™ tanks)
Certificates	ISO 9001, ISO 14001, OHSAS 18001, Approval of Manufacturers for Deck Cranes (INK)

Aioi Works

Site Area	183,823m ²
Products & Services	Boilers, LNG tanks, pressure vessels for chemical plants, prefabricated piping systems and casting products for machinery
Certificates	ISO 9001, ISO 14001, ASME (S, U, U2), Approval of Manufacturers

Kure Aero-Engine & Turbo Machinery Works

Site Area	47,797m ²
Products & Services	Parts of gas turbine power plants, jet engines and gas turbines
Certificates	JIS Q 9100 & JIS Q 9001 (ISO 9001), JIS Q 14001 (ISO 14001), JIS Q 27001 (ISO/IEC 27001), Nadcap

Main Group Affiliates and Works in Japan

Resources, Energy & Environment Business Area

IHI Enviro Corporation

Services related to the design, manufacturing, installation, maintenance and management, renovation and repair, operational instruction, operation maintenance management, sales and lease of biomass treatment facilities, wastewater treatment facilities, and related machinery and instruments

IHI Plant Engineering Corporation

Services related to the engineering, procurement, construction, commissioning, and maintenance of oil processing, petrochemical, chemical, power, and pharmaceutical plants / plant equipments supply

IHI Plant Construction Co., Ltd.

Engineering and construction of power generation facilities (thermal, nuclear, wind and solar), storage facilities, blast furnaces for steelworks and other types of equipment and facilities

Diesel United, Ltd.

Design, manufacturing, sales, repair and maintenance of diesel/dual fuel engines

Main Works **Aioi Works**

Site Area 98,882m²
 Products & Services Diesel engines, dual fuel engines, industrial machinery and related equipment
 Certificates ISO 9001 (JIS Q 9001), ISO 14001 (JIS Q 14001)

NIIGATA POWER SYSTEMS CO., LTD.

Manufacture, sale and other services for diesel engines for marine, power generation and rail-traction use, gas engines, gas turbines, and Z-peller® propulsion units

Main Works **Ohta Plant**

Site Area 151,562m²
 Products & Services Diesel engines, gas engines, dual-fuel engines and Z-peller® propulsion systems
 Certificates ISO 9001, ISO 14001, NK, LR

Kanamachi Purification Plant Energy Service Co., Ltd.

Power and steam supply to Tokyo Metropolitan Government Bureau of Waterworks

IHI PACKAGED BOILER CO., LTD.

Sales and maintenance service of packaged boilers

Kotobuki Iron Works Co., Ltd.

Manufacturing of boiler and diesel engines parts

Site Area 19,000m²
 Products & Services Manufacturing of parts for generators and chemicals plants and for turbine casings, diesel engines, and others
 Certificates ISO 9001 (JIS Q 9001)

Toyosu Energy Service Co., Ltd.

Supply business operations; electric power, steam, hot water, and air conditioning

TOSHIBA IHI Power Systems Corporation

Fabrication of casing and nozzle diaphragm for steam turbines

Aomori Plant Co., Ltd.

Nuclear power facility remodeling, construction and maintenance

Japan Jurong Engineering Co., Ltd.

Plant engineering service (JEL Group's sales liaison in Japan), Engineer dispatching/recruiting service

NICO Precision Co., Inc.

Manufacture and sale of parts for motors

Social Infrastructure & Offshore Facilities Business Area

IHI Infrastructure Systems CO., LTD.

Design, fabrication, construction, diagnosis, repair, and conservation of bridges, floodgates, and other steel structures, and manufacture, sale, and installation construction of disaster prevention devices

Main Works **Sakai Works**

Site Area 170,145m²
 Products & Services Design, fabrication, construction, assessment, repair and maintenance of bridges, gates and other steel structures
 Certificates ISO 9001 (JIS Q 9001), ISO 14001 (JIS Q 14001), and OHSAS 18001

IHI Construction Service Co., Ltd.

Engineering, maintenance and repair of bridge, gates and steel structures, pre-stressed concrete product manufacture and construction work design, execution, etc.

Niigata Transys CO., LTD.

Manufacturing and sale of rolling stock, industrial vehicles, snowplows, etc., and design, manufacture, and construction of automated guide-way transit

Main Works **Niigata Works**

Site Area 98,512m²
 Products & Services Rolling stock, automated people movers, light-rail vehicles, maintenance cars and snow plows
 Certificates ISO 9001 (JIS Q 9001)

IHI CONSTRUCTION MATERIALS Co.,Ltd.

Manufacturing and installation of pre-cast concrete materials

JIM TECHNOLOGY CORPORATION

Design and sale of tunnel boring machines and equipment

Chiba Warehouse Co., Ltd.

Warehousing, real estate rental, and peripheral businesses

Livecon Engineering Co., Ltd.

Patent management and supervision for construction materials

San-Etsu Co., Ltd.

Maintenance and repair of track maintenance machines, snowplows and construction equipment, and engines, etc.

Others

IHI Business Support Corporation

Real estate management, insurance agent business and data processing services and more

Seiban Development Co., Ltd.

Management of golf courses

IHI Trading, INC.

Sales of equipment and machinery, turbochargers, parking equipment, concrete products, alcoholic beverages, and other products

IHI Inspection & Instrumentation Co., Ltd.

Inspections and measurements of plants and components. Chemical and environmental analysis. Development, engineering, design, manufacture, and installation of control and monitoring systems including various types of testing equipment and automotive environmental inspection and measurement equipment

Takashima Giken Co., LTD.

Design, manufacture, sale, installation, repair, and maintenance of various types of non-destructive inspection equipment

IHI Scube Co., Ltd.

Development, maintenance and support of computers and network systems related to information and communication, engineering, manufacturing, and others. Management service of computer systems operation maintenance

MEISEI ELECTRIC CO., LTD.

Manufacture and sale of devices and equipment for telecommunications, electrons, electrical measuring, and information processing, etc., construction design, contracting, and other incidental services, etc.

MEISEI MANAGEMENT SERVICE CO., LTD.

Temporary staffing services, land and property cleaning, maintenance and security services, etc.

Industrial Systems & General-Purpose Machinery Business Area

IHI Transport Machinery Co., Ltd.

Plan, development, design, manufacture, sales, lease, installation, maintenance, remodeling and Operation and Management services of Parking Systems and Materials

Main Works **Numazu Works**

Site Area 125,075m²
 Products & Services Tower parking system (pallet type / pallet-less type / rotary type), Super square parking system, Multi-Storey parking system
 Certificates ISO 9001

IHI Fuso Engineering Co., Ltd.

Engineering, manufacturing, construction and maintenance services for parking systems

Nishi-Nihon Sekkei Engineering Co., Ltd.

Design and drafting of transport machinery and other steel structures

IHI Technical Training Institution

Construction machinery and cranes operator training, etc.

Voith IHI Paper Technology Co., Ltd.

Design, manufacture, sale, installation, and maintenance and repair of paper manufacturing plants

IHI Logistics & Machinery Corporation

Sales, design, fabrication, purchasing, construction, installation, modification, repairs of material handling systems, FA systems and industrial machinery, as well as the servicing and maintenance of devices and parts

CENTRAL CONVEYOR COMPANY, LTD.

Engineering, manufacturing and selling of logistics equipment and industrial machines

Aero Engine, Space & Defense Business Area

INC Engineering Co., Ltd.

Manufacturing of sound and vibration control equipment

IHI AEROSPACE CO., LTD.

Design, manufacture and sales of space equipment and defense machinery, and manufacture and sales of aircraft engine parts

Main Works **Tomioka Plant**

Site Area 490,490m²
 Products & Services Rocket and other space related products, defense related products and Aircraft engine parts
 Certificates JIS Q 9100 & JIS Q 9001 (ISO 9001), ISO 14001 (JIS Q 14001), JIS Q 27001 (ISO/IEC27001), OHSAS 18001

IHI AEROSPACE ENGINEERING CO., LTD.

Design, research, and experiment subcontracting for space development equipment

Paul Wurth IHI Co., Ltd.

Engineering, manufacture, sales, construction, installation, and maintenance services for iron-making machinery (blast furnaces and related facilities, coke ovens, coke dry quenching, and iron-making-related environmental facilities)

IHI Compressor and Machinery Co., Ltd.

Manufacturing and sales of general-purpose compressors, turbochargers for ships, hydraulic motor, hydraulic pumps, gear and lubricating systems. Plant engineering, installation, maintenance, and after-sales services

Main Works **Tatsuno Works**

Site Area 89,058m²
 Products & Services Compressors, turbochargers for ships, and hydraulic motors
 Certificates ISO 9001, ISO 14001, DNV, LR, ABS, BV, KR, CCS, JG, NK and CR

IHI Turbo Co., Ltd.

Manufacture and sale of turbochargers for vehicles

Main Works **Kiso Works**

Site Area 65,194m²
 Products & Services Automotive turbochargers and superchargers
 Certificates ISO/TS 16949, ISO 14001, NK, JG

Clover Turbo Co., Ltd.

Repair, design, manufacture, sales and service of after-market turbochargers

IHI Ionbond Japan Co., Ltd.

Coating services and coating equipment sales and services

IHI Machinery and Furnace Co., Ltd.

Engineering, manufacture, sales, and service of vacuum and new material furnaces, vacuum degreasing machines, and other heat treatment equipment

Main Works **Kakamigahara Works**

Site Area 16,084m²
 Products & Services Vacuum heat treatment furnaces, vacuum carburizing furnaces and vacuum degreasers
 Certificates ISO 9001

IHI Shibaura Machinery Corporation

Development, manufacture and sale of engines, tractors, grass and lawn management machines, anti-bacterial and deodorizing devices, castings and electronic control units

Main Works **Matsumoto Factory**

Site Area 102,216m²
 Products & Services Engines, tractors, grass and management machines
 Certificates ISO 9001 (JIS Q 9001), ISO 14001 (JIS Q 14001)

IHI STAR Machinery Corporation

Manufacture and sale of agricultural machinery for tractors

Main Works **Chitose Works**

Site Area 86,100m²
 Products & Services Tractor implements, such as hay and grass harvesting equipment
 Certificates ISO 9001

IHI Jet Service Co., Ltd.

Gas turbine power plant & maintenance, engineering support (aero engine, space development), production support, sales of aero engine parts

IHI MASTER METAL Co., Ltd.

Manufacture and sale of precision casting materials and special alloys and other products

Site Area 12,557m²

Products & Services Steel and non-ferrous alloy melting stocks for casting
 Certificates JIS Q 9100 & ISO 9001, JIS Q 14001 (ISO 14001), ISO/IEC17025, Nadcap

IHI CASTINGS CO., LTD.

Manufacture and sale of precision casts

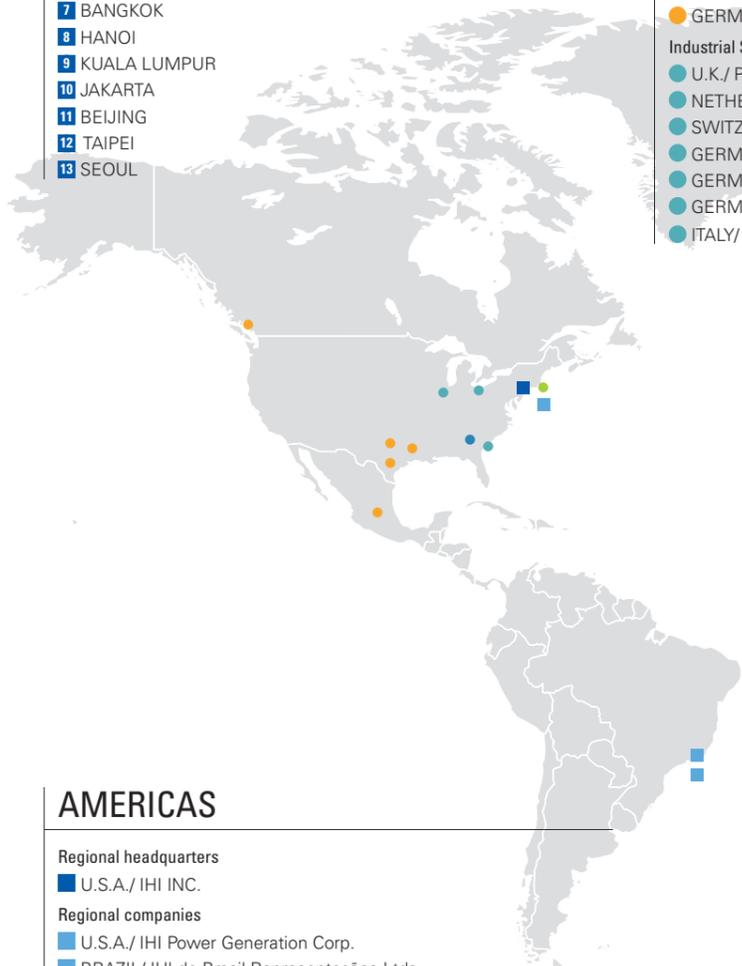

Main Works **Soma Works**

Site Area 15,281m²
 Products & Services Precision castings for aero engines and industrial gas turbines
 Certificates JIS Q 9100 & JIS Q 9001, JIS Q 14001 (ISO 14001)

Historical Highlights

IHI helped pioneer Japan's heavy industry. We started out by accumulating shipbuilding technology that we applied to industrial machinery, plant manufacturing and construction. Now we are a key provider of massive elements of industrial and social infrastructure. Our products underscore our management philosophy of contribute to the development of society through technology.

1853
Ishikawajima Manufacturing Shipyard established to protect to invasion of western countries, after a fleet under U.S. Commodore Matthew Perry arrived. The Mito clan set up this facility on instructions from Japan's feudal government.

1866
Completed the Chiyodamaru, Japan's first steam-powered warship. This vessel employed the first naval steam engine manufactured in Japan.

1876
Established Ishikawajima Hirano Shipyard. Tomiji Hirano set up the nation's first private sector shipyard.

1907
Established Harima Dock Co., Ltd. Seitaro Karahata, the head of Aioli village (now Aioli City) in Hyogo Prefecture, established that firm.

1911
Completed steel structures for Tokyo Central Station (now Tokyo Station). The company broke away from the convention of erecting a scaffold, winning accolades among architects by using two movable cranes instead.

1945
Produced the Ne20, Japan's first jet engine. The engine powered the successfully maiden flight of Japan's first jet.

1959
Established Ishikawajima do Brasil Estaleiros in Brazil. This was the first Japanese-owned shipyard overseas and heralded the overseas expansion of Japanese companies.

1960
Established Ishikawajima-Harima Heavy Industries Co., Ltd. This was the fruit of a merger between onshore machinery leader Ishikawajima Heavy Industries Co., Ltd., and Harima Shipbuilding & Engineering Co., Ltd., a top player in its sector.

1978
Built the world's first barge-mounted pulp manufacturing plant specifically for Brazil. IHI built this 230-meter facility, mounted it on a barge, and towed it to Brazil.

1997
Constructed large shield tunneling machine for Tokyo Bay Aqualine. With a diameter exceeding 14 meters, this machine dug a 2,853-meter tunnel under Tokyo Bay.

2002
Delivered Japan's first tower boiler. We delivered this 600MW boiler to the Isogo Thermal Power Station. The second boiler that we delivered to that facility, in 2009, attained the world's highest steam condition. (Photo provided by J-Power (EPDC))

2007
Company name changed from Ishikawajima-Harima Heavy Industries Co., Ltd., to IHI Corporation. Group seeks to become an advanced global brand.

2011
Participating in a project for an advanced GENx jet engine. We have a roughly 15% share in the international program for this jet engine, which offers significantly improved fuel economy.

2013
Epsilon Launch Vehicle. This solid, next generation propellant launch vehicle delivers high performance and low cost. (photo courtesy of JAXA)

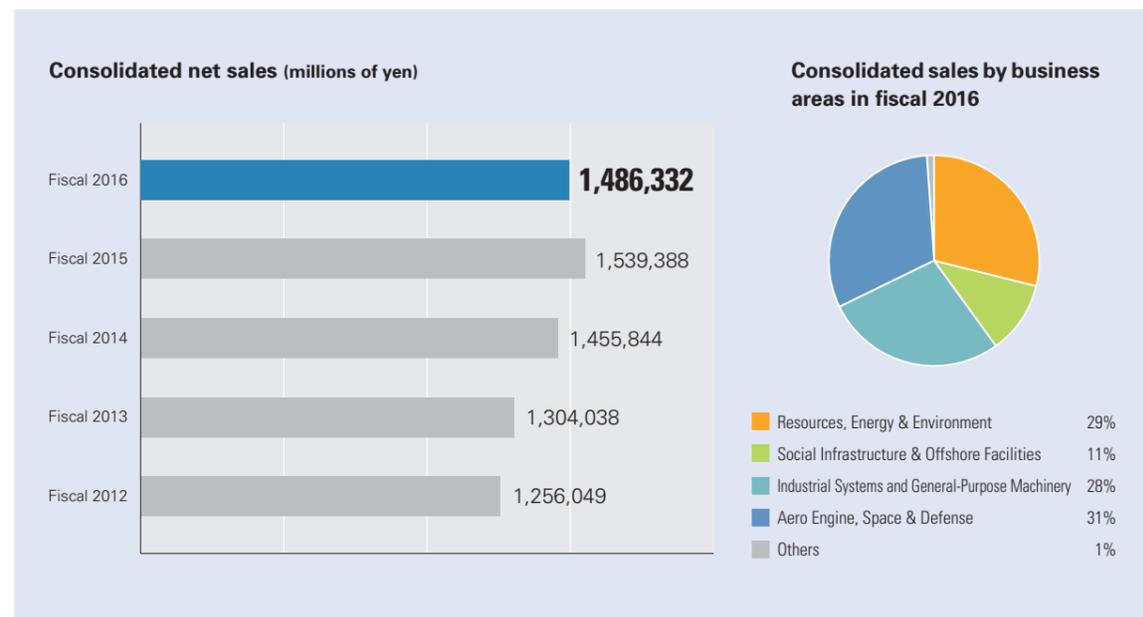

2015
Reached total production of 50 million turbochargers for vehicles. IHI group reached a total production volume of 50 million turbochargers. We will expand production and sales activities worldwide while meeting various needs based on our highly reliable development and production technologies.

2016
Osman Gazi Bridge, Turkey's longest suspension bridge, opens to provide a crossing over Izmit Bay. Crossing western Turkey's Izmit Bay from south to north, the 1,550-meter structure is the world's fourth-longest suspension bridge.

Boilers

IHI has supplied the world with highly efficient and reliable coal-fired boilers that draw on its advanced technologies. With boilers based on our Clean Coal Technology, we contribute to the effective and economical use of valuable energy resources. We will continue to provide models employing coal and other fuels to customers around the world. We are augmenting flue gas treatment systems by pushing ahead with development to rapidly commercialize oxy-fuel combustion technology and CO₂ chemical absorption technology that lowers carbon dioxide emissions. We are also working on gasification and pre-dry technologies for lignite, a low-grade coal. We are accommodating diverse customer needs by supplying compact packaged boilers that deliver heat and steam to factories and other facilities.

Main Products

- Boilers
- Packaged boilers
- Flue gas treatment systems

Boiler for IPP and PPS

Small packaged once through boiler

Gas turbines, Gas engines & Diesel engines

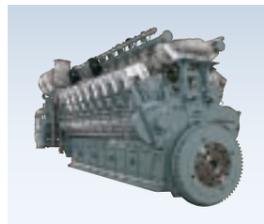

IHI provides wide variety of power generating products including gas turbines, diesel engines and gas engines with simple-cycle, co-generation and combined-cycle power systems. We also provide remote monitoring, engine maintenance, and other services throughout product lifecycles. We are achieving the reduction of NOx and CO₂ emissions by adopting high efficiency and low emission type of gas turbines. We supply gas turbines for high-speed ships and other marine vessels. We also supply a full range of diesel engines, from large engines capable of medium and low speeds to small and midsize models delivering low, medium, and high speeds. Our diverse lineup includes diesel engines for land-based power generators.

Main Products

- Simple/combined cycle power generation systems
- Emergency power generation systems
- Co-generation systems
- Diesel engines (marine, land)
- Gas engines
- Gas turbines

Gas turbine power plant "LM6000"

Gas engine "18V28AGS"

Diesel engine "28AHX"

DU-WIN GD W9X82 diesel engine

LNG receiving terminal / storage tank

IHI is Japan's leading provider of LNG receiving terminals and storage tanks. We are also active overseas, with a strong track record in India, Qatar, Mexico, Taiwan, the United States, and China. Particularly for LNG storage tank construction, we are able to handle all types of tanks including Double-walled metal tank, Pre-stressed concrete (PC) full containment tank and in-ground membrane tanks, with leading global market shares for such facilities.

Main Products

- LNG receiving terminal
- Above ground LNG storage tank
- In-ground LNG storage tank
- Underground LNG storage tank

In-ground LNG storage tank

Processing & Pharmaceutical plants

In such diverse areas as natural liquefaction plants and oil refining, petrochemicals, LPG, and other process plants, and pharmaceuticals plants, we have a strong track record in Japan and internationally in integrating everything from construction engineering to equipment procurement, construction, and startups.

Main Products

- Oil & Gas plants
- Chemical plants
- Natural Gas Liquefaction plants
- Pharmaceutical / Fine Chemical plants

Natural Gas Liquefaction plants

LPG plant

Pharmaceutical plant

Equipment for plants

We provide an array of plant equipment, including heating furnaces, cooling towers, and chemical plant reactors.

Main Products

- Vertical pulverizing super-hybrid mills
- Furnaces
- Air-cooled heat exchangers
- Chemical plant equipment
- Cooling towers
- HTS reactors
- EO reactors

Pressure vessels

Roller mills

Cooling towers

Environmental response systems

Our systems contribute greatly to environmental protection and remediation. We draw on our technologies and experience and emphasize product, thermal, and materials recycling to provide engineering, construction, operation and maintenance services for waste and industrial effluent as well as public sewage treatment facilities. IHI has a strong history in providing flue gas desulfurization and denitrification facilities for thermal power stations and industrial plants.

Main Products

- Waste treatment facilities
- Biomass treatment facilities
- Wastewater treatment facilities
- Flue gas treatment facilities

Biomass processing
(Clean Association of TOKYO)

Wastewater treatment facility

Flue gas treatment facility

Nuclear energy

IHI supplies such key components as reactor pressure vessels, primary containment vessels, and piping systems. We develop and construct nuclear fuel cycle systems as well as supply components for conventional boiling water reactors (BWRs) and advanced boiling-water reactors (ABWRs). We also supply equipment for pressurized-water reactors (PWRs). Moving forward, we plan to engage in decontamination and decommissioning of nuclear power facilities.

Main Products

- Components for nuclear power plants
- Facilities for nuclear fuel cycle related equipment
- Pressure vessels

Reactor containment vessel

Reactor pressure vessel for BWR nuclear power plant

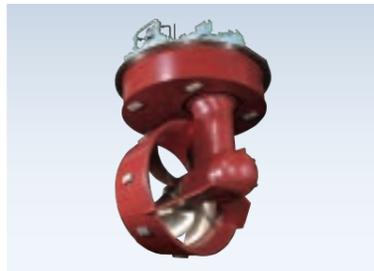

Vitrification facility for high-level radioactive waste

Propulsion systems

Our Z-peller® is the most propulsion system in the global tugboat market, and has earned an outstanding customer reputation for its high quality and durability. The diverse other applications for this system include fireboats, oil skimmer boats, and other disaster prevention vessels, as well as floating cranes, dredgers, drill rigs, and support vessels.

Main Products

- Z-peller® propulsion systems

Z-peller® propulsion systems

Bridges, Water gates & Steel structures

IHI has constructed numerous major bridges worldwide. Included are the Seto Ohashi Bridges and the Akashi Strait Bridge in Japan, the Second Bosphorus Bridge and the Golden Horn Bridge in Turkey, the Carquinez Bridge in the United States, and the Binh Bridge and the Nhat Tan Bridge in Vietnam. We are Japan's top manufacturer of water gates for rivers and dams. Our capabilities extend from manufacturing and installation to inspection and maintenance. We contribute to water usage and flood control projects in Japan and overseas, particularly in Southeast Asia. We deliver large steel structures incorporating machinery and put a focus on the increase of hybrid structures, including caissons and pontoons that combine the strengths of steel and concrete. We have integrated steel structures, mechanical, sensor, control, and other technologies to develop active mass dampers and seismic isolation floor systems. These systems serve important disaster prevention roles in high-rise buildings and computer centers.

Main Products

- Bridges
- Water gate equipment for rivers
- Water gate equipment for dams
- Floating breakwater
- Floating platforms
- Immersed tunnels
- Hybrid caissons
- Composite slabs
- Sound-absorbing panels
- Temporary assembling bridges
- Mass damper systems
- Seismic isolation floor systems

Osman Gazi Bridge across Izmit Bay

Cable-stayed bridge "Nhat Tan Bridge"

Arch bridge "Tsukiji Ohashi"

River gate

Dam gate

Hybrid caissons

Active mass dampers

Shield tunneling machines & Concrete construction materials

IHI developed the world's largest shield and rotating shield tunneling machines, which have greatly improved construction efficiency. IHI is the world's leading supplier of automatic segment assembling systems while also providing various types of segments.

Main Products

- Shield tunneling machines
- Segment
- Automatic segment assembling systems

Large-diameter shield tunneling machine

Special section (double-o tube) shield tunneling machine

IKK Composite Segment

Transportation systems

IHI contributes to traffic safety, which is essential for daily life, in various ways. Furthermore, we supply various railway systems, including ultra-low floor streetcars, which are human- and environment-friendly and essential for building new towns, light diesel locomotives to ensure local traffic, and maintenance vehicles to keep railway systems running.

Fukui Railways, FUKURAM

Main Products

- Transportation systems
- Rolling stocks
- Snowplows
- Maintenance vehicle

Hiroshima Rapid Transit, Astram Line

Sanriku Railway, Type 36-700

Urban development

We optimize the potential of our real estate holdings by redeveloping company offices and housing nationwide. We engage in leasing and sales, particularly in metropolitan Tokyo. A good example of this approach is in Toyosu, known for former shipbuilding yards, where we are undertaking a massive urban redevelopment project. We also prioritize using idle land, as part of which we operate Japan's biggest mega solar generating business, in Kagoshima, thereby contributing to environmental and social sustainability.

Rental office buildings "TOYOSU FORESIA™", "TOYOSU FRONT™"

Joint housing business with major developer

Kagoshima Megasolar

Main Products

- Real estate leasing and sales

Security

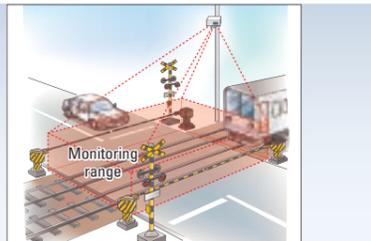

IHI provides various products based on mechatronics and sensing technologies. IHI 3D Laser radar is applied to Railway level crossing obstacle detection system and Driving safety system as infrastructure sensors. It has achieved over 1,700 units supply record over the world and been exploring for other sensing business fields. IHI also supplies X-ray visual inspection system for large size cargo container, for which IHI is the domestic market leader. We have ample track record for airports and seaports custom check including small and mid-sized X-ray inspection system.

Main Products

- 3D laser radar systems
- X-ray inspection systems
- Monitoring equipment
- Oil leak monitors
- Noise reduction systems
- Disaster prevention equipment
- Weather observation system

3D laser radar

F-LNG

The IHI Group independently developed SPB™ (Self-supporting Prismatic shape IMO type B) Tanks, which are "LNG Cargo Containment System for LNG Carrier and Floating LNG Unit". The tanks serve on IHI-constructed LNG carriers that have served safely LNG transportation even in the world's harshest sea condition between Alaska (Kenai) and Japan for more than 20 years. As LNG demand expands, companies are exploring the use of floating units to develop offshore gas fields. SPB™ systems have attracted attention worldwide as ideal LNG cargo containment system.

FPSO (Floating Production Storage and Offloading) is a floating production system that receives fluids (crude oil and host of other things) from a subsea reservoir and produces, stores and offloads petroleum products to tankers. Our Aichi Works recently completed a one-million-barrel floating vessel that is now operating in Southeast Asia.

Main Products

- F-LNG/LPG-FPSO
- SPB™ tank (LNG/LPG/LEG storage tank)
- FPSO/FSO
- Semi-Submersible Rig
- Mega-Float, others

Conceptual diagram of the F-LNG

SPB™ tank

Industrial Systems & General-Purpose Machinery Business Area

Rotating machinery

IHI provides an array of compact and packaged machinery for plant utilities. Our offerings include separators, filters, dewatering equipment, and air compressors. We draw on many years of expertise from custom-manufacturing compressors, and our liquefied natural gas BOG plant compressors dominate the market. Our organic rankine cycle power generator can produce electricity from water with temperatures ranging from 70°C to 95°C, helping customers to conserve and create energy.

Main Products

- Separators
- Filters
- Compressors
- Organic rankine cycle power generator
- Gear

Screw Decanter Centrifuge

IHI-Leaf Filter

IHI-FUNDABAC Filter

Centrifugal air compressor

Process reciprocating compressor

Organic rankine cycle power generator

Turbochargers

IHI supplies a wide range of turbochargers from large ones for land and marine power generators to small ones for automobile engines, and has already produced more than 50 million turbochargers for vehicles. We have development, production, and sales bases also in the U.S., Europe, Thailand, China, and Korea and are growing our business worldwide.

Main Products

- Turbochargers

Turbochargers for vehicles

Turbochargers for marine vessels

Grid scale energy storage system

IHI provides turnkey solutions for grid scale energy storage system, centered on its ESWare suite of advanced control systems.

- (1) Analysis: Evaluating project profitability before project deployment and optimizing system configuration
- (2) Control: Managing systems in real time in line with customer requests and optimization directives
- (3) Optimization: Formulating operational strategies to optimize profitability based on past operational results and weather, load, and other forecasts

Grid scale energy storage system

- ### Applications
- Peak shifting and shaving
 - Renewable integration
 - Frequency regulation
 - Backup power sources

ESWare™ -ES/analyzer

Heat treatment and surface engineering

Heat treatment processes and equipment are used in many industries. IHI supplies an array of equipment to meet user needs. Our heat treatment equipment offerings include vacuum heat treatment furnaces, highpressure dewax sintering furnaces, hot presses, high purification furnaces, vacuum carburizing furnaces, and vacuum vapor degreaser. In addition to supplying equipment, IHI itself maintains a heat treatment processing business.

We supply PVD/PACVD coating equipment using plasma technologies and are engaged in state-of-the-art thinfilm coating and surface-treatment business, where we developed the MSCoating™, an innovative technology that uses an electrode discharge process.

Main Products

- Advanced material manufacturing equipment
- Vacuum thermal treatment equipment
- Thin film and surface treatment equipment
- MSCoating™
- Heat treatment and coating services

Vacuum thermal treatment furnace

Vacuum carburizing furnace

PVD / PACVD coating equipment

Vacuum degreaser

CVD coating equipment (Ionbond Bernex™ CVD)

Job Coating Service

Agricultural machineries, Small power systems, and Life associated equipment

IHI supports agriculture with machinery for cultivating, fertilizing, seeding, harvesting, and other tasks. Our lawn maintenance machines, grass cutters, and campus greening equipment help maintain landscapes and lawns at an array of sports facilities. They include golf courses, soccer, baseball, and athletic fields, and racecourses. Our equipment is also utilized heavily at schools, parks, riverbanks, and homes.

Our products serve in hospitals, clinics, nursing homes, hotels, restaurants, airports, train stations, and factories. We manufacture ozone deodorizers and disinfectors, accommodating rising demand for deodorization, sanitization, dust removal, and cleaning applications.

Main Products

- Agricultural machines
- Lawn maintenance machines
- Ozone deodorizers / ozone disinfectors
- High-temperature heating system
- Diesel engines

Lawn maintenance machines

Ozone air cleaner *eZ-2000D*

Small diesel engine (N4L DI-TA)

Round baler

Endoscope sterilizer

Transport machinery

IHI has remained a technology leader in this field for a century. We accommodate needs ranging from under one metric ton to thousands of metric tons. Our offerings include bulk handling systems, such as port unloaders. Through standardization, we have increased economy with jib and overhead travelling cranes for various industries. We leverage advanced technologies in manufacturing through maintenance and modifications. We are a top supplier of jib climbing cranes for skyscraper and dam construction.

Continuous ship unloader

Jib crane

Jib climbing cranes

Main Products

- Unloaders
- Coal unloading and transportation facilities
- Overhead traveling crane
- Jib cranes
- Jib climbing cranes
- Hoists

Parking

Since installing Japan's first tower parking system in 1962, IHI never stops innovating. IHI's strength comes from its longstanding experience and proprietary technology that enable continuous perfection of IHI parking system. IHI is determined to introduce more eco-friendly systems that are both reliable and efficient to fulfill our customer's and environmental requirement. IHI pledges to optimize our parking solutions to benefit the society and future generations to come.

Tower parking (pallet type)

Tower parking (pallet-less type)

Super square parking

Multi-Storey parking

Main Products

- Parking systems

Iron, Steel and Coke-making equipment

IHI provides steelmakers with advanced blast furnaces, coke ovens, sinter plants, and auxiliary facilities that contribute to the safe, economic, and environmentally friendly production of the iron, steel and coke products that enhance modern living.

Blast furnace (© NIPPON STEEL & SUMITOMO METAL CORPORATION)

Main Products

- Industrial furnaces

Pulp & Paper machinery

IHI is Japan's premier maker of pulp and paper manufacturing machinery, supplying papermakers with the largest and fastest paper-making and paper-coating machines. We have an unmatched record overseas as well as in Japan.

Paper machine

Main Products

- Pulp & paper machinery

Logistics systems

IHI pioneered and is a leading company in numerous areas of logistics such as automated storage and retrieval system (ASRS), transportation system, and sorting systems. Our ASRS can be used at temperatures as low as -60°C, or store hazardous materials. We also provide transportation system for clean rooms. These systems are used in logistics, food, and chemical industries. We draw on our expertise to provide comprehensive logistics solutions.

High-speed picking and storage system "Shuttle and Server"

IHI Automated Storage / Retrieval System "Rack-pack"

Roll to roll handling system for flexible device

Main Products

- Automated material handling systems in clean room
- Storage systems
- Transportation systems
- Sorting / picking systems

Rubber & Film molding equipment

Our calender lines are used to manufacture plastic films and rubber sheets for tires. IHI continues to build on its strong record in this business around the world. We contribute to productivity improvements through our state-of-the-art high-precision thickness control technology and automation technologies.

Calender for plastics

7-Roll calender
(the world's biggest calender for rigid film production)

Creel autoloading system

Main Products

- Rubber and film molding equipment (calender)

FA systems for the automobile industry

High-speed tandem press lines are essential to form automobile bodies and chassis. Our factory automation (FA) systems, including our high-speed transfer feeders, hybrid regenerative cushion systems, destack feeders, panel racking systems, automatic die change systems, total line controls and other FA systems, ensure the world's fastest productivity with less energy consumption considering the environment.

High-speed transfer feeder (V-feeder)

High-speed tandem press line with V-feeder

- Hybrid regenerative cushion system

Aero Engine, Space & Defense Business Area

Aircraft engines

IHI is Japan's leading maker of jet engines, with a market share of between 60% and 70%. We are the primary contractor and manufacturer for aircraft engines used by the Ministry of Defense. We collaborate in international projects to develop and supply large and small engines for all types of civilian aircraft. We have leveraged our experience and manufacturing technologies to provide maintenance for all types of engines. We are considered Asia's core maintenance center. To meet the growing demand for eco-friendly engines and fulfill our corporate responsibility, we are developing next-generation engines that draw on our advanced technologies.

Main Products

- Turbofan engines
- Turboshaft engines
- Turbojet engines
- Turboprop engines
- Jet engine maintenance
- Jet engine test cells
- Jet engine parts

PW1100G-JM turbofan engine

GE9x turbofan engine

GE90 turbofan engine

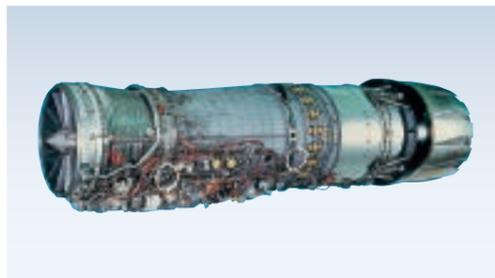

V2500 turbofan engine

CF34 turbofan engine

Aero Engine Maintenance

F110 turbofan engine

F7-10 turbofan engine

F3 turbofan engine

T700 turboshaft engine

Rocket systems & Space exploration

IHI has participated in Japan's space development effort from the outset. We have applied our cryogenic-pump and turbomachinery and other technologies to develop and manufacture the turbopumps and gas-jet systems crucial to successful rocket launches. Our involvement in Japan's space program expanded significantly in 2000, when we acquired Nissan Motor's Aerospace Division, a pioneer in solid-fuel rocket development in Japan. We play an important role in developing and constructing the Exposed Facilities of the KIBO Japanese Experiment Module, which is a part of the International Space Station program. We support experiments in space by supplying experimental systems needed for cooperative international projects.

Main Products

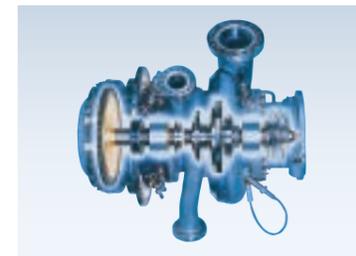

- Rocket
- Rocket propulsion systems
- Rocket control systems
- Satellite propulsion systems
- Satellite control systems
- Equipment for utilization of space environment
- Space station-related equipment
- Ground test facilities
- Ground support facilities

H-IIA Launch Vehicle (© JAXA)

Epsilon-2 Launch Vehicle (© JAXA)

Liquid oxygen turbopump for the H-IIA rocket LE-7A engine

Development of HTV propulsion system and exposed palette (HTV: H-II Transfer Vehicle) (© JAXA/NASA)

JEM Small Satellite Orbital Deployer (J-SSOD) (© JAXA/NASA)

Liquid hydrogen turbopump for the H-IIA rocket LE-7A engine

22N thruster
Development of bipropellant liquid apogee engine, etc., used to obtain geostationary orbit

Our Offices Around the World

EUROPE, MIDDLE EAST, AFRICA

- LONDON:** IHI Europe Ltd.
2nd Floor, America House, 2 America Square, London EC3N 2LU, U.K.
TEL: +44(20)7481-8180 FAX: +44(20)7481-4955
- PARIS:** 17, Rue d'Orleans, 92200 Neuilly sur Seine, FRANCE
TEL: +33(1)4643-1493 FAX: +33(1)4637-7869
- ALGIERS:** Boulevard du 11 Decembre 1960, Lot No.12 Cooperative Essalam, Appartement No.02, 1er etage, El Biar, Alger, ALGERIE
