

# SSTH passenger car ferry

# OCEAN ARROW

## MAJOR FEATURES

- The Super Slender Twin Hulls (SSTH) reduce great amount of wave resistance and wake wash.
- The Double Step Bow (DSB) realizes good seaworthiness in rough seas.
- The whole hull and the superstructure is constructed of aluminum alloy.
- No supporting pillar is installed on the vehicle deck for smooth loading.
- The attractive external appearance is the fruit of the collaboration of IHI and an industrial design office.
- The accommodation is elegantly furnished for the maximum passenger comfort.
