WRAPPING MACHINE

MODEL: SWM0830

MWM070W / MWM1250W

<http://www.ihico.jp/iat/en/>

A portable machine for mini round bale

Light weight body with the engine enables you to work anyplace you like.

Model: SWM0830

Best partner for STAR mini round baler

Specially designed wrapping machine for the bale made by STAR Mini round baler MRB0850, MRB0870 and MRB0855 series. The best working performance would be brought by the combination with STAR Mini round balers.

MRB0850·0870

MRB0855 series

Bale size

Work anyplace you like

Since 2.8 PS(Max) gasoline engine is equipped with, you don't need to prepare any tractors or power supply. In addition, machine is desinged so compact and lightweight and has a handle and wheels that anyone can move the machine quite easily. You can move and work anyplace you want.

Auto-Stop function

The layer of wrapping films is selected easily from 2, 4 or 6 layers by just changing the position of pin. When the layers reach a set value, Auto-stop function works to stop the rotation of wrapping table automatically. After starting the table rotation by the lever, you can start to prepare a next bale .

Aluminium stretch roller(All models)

Aluminium-made the stretch rolles are adpted for all models including MWM series. Comparing to rubber-made roller, high durability are expected. Cylindrical rolles stretch the film so properly and evenly that they helps to male high quality wrapped silage.

Efficient wrapping for middle round bale

High mobility and automatic operation ensure quick sealed for good silage.

Model: MWM1070W

Efficient wrapping with middle baler

Best combination of middle wrapping machine and STAR middle round baler realize making high-quality silage. Diameter 85-115cm and width 85-100cm of round baler can be wrapped with the wrapping machine efficiently.

TRB0910

TRB/TCR0950-2240 series

Self loading system

Since the bale can be loaded / unloaded by the machine itself, another loading machine is not required. This Self loading system is adopted in all MWM series (tractor mounted series)

Suitable with small power tractor

This tractor-mounted wrapping machine is suitable to be used with small tractor because of its caster wheels. As the wheels support the weight of the bale during film wrapping, tractor doesn't need to support all the weight of the machine and bale. 360 free turning caster wheels enable the machine to make sharp turn in a small field. In transportation, the machine can be lifted by tractor then move to another places quickly.

MWM1070W

MWM1250W

Automatic operation with control box

Every movement of the machine are controlled by electric and automatically operated with control box equipped as standard. Especially, MWM1070W has full-automatic operation function. Operator can finish wrapping one bale just only touch a button on the control box 2 times. Operator can be free from complex operation of the machine and can concentrate on tractor driving.

MWM1070W

MWM1250W

Speedy and steady wrapping for middle/big round bale

Good quality silage by stable bale rotation and high speed film wrapping.

Model: MWM1250W

For both middle and big round

Best match for the bale made by big round baler (Dia. 120cm x Wid.122cm). In addition, middle size bale made by TRB/TCR2240 series (Dia.100cm x Wid.100cm) can be wrapped by attaching special parts equipped as standard. Both middle and big round bale can be covered by one wrapping machine.

TRB/TCR2240 series
(Dia.100cm x Wid.100cm)

Big Round baler series
(Max.Dia.130cm x Wid.130cm)

Half time for film wrapping

Double stretch device which can wrap two films at the same time is equipped as standard. Comparing to Single stretch, the time for film wrapping is reduced by half then total working can be reduced.

Stable rotation with ribbed steel rollers

3 pieces of ribbed steel rollers trace the shape of the bale on the table and rotate it consistently. Steady overwraps of the films contributes making high quality silage.

(SWM0830·MWM1070W : combination of 2 steel rollers and plastic belt)

Power package

Hydraulic outlet of the tractor doesn't required since the hydraulic power package. Power package ensures stable oil pressure and prevents the tractor from the trouble occurred by the mixture oil of different tractors. (All tractor mounted type MWM have a power package)

MWM1250W
