

# IHI De-palletizing Robot system

The Worlds First De-palletizing Robot Controlled by Deep-learning AI

## Object recognition by Deep-learning AI

- ✓ Simplification of pre-registration for starting operation.
- ✓ 30% improved de-palletizing capability sizes.
- ✓ Supports mixed-load pallets

### Available Single & Mixed load Pallet

Single load Pallet

Mixed load pallet

### Various Control Method

#### Independent Mode

Safety Handling is available without Pallet Information After Initial Setting.

#### Collaboration Mode

To Realize Fast handling, AI system select suitable transportation speed itself by using pallet information

**IHI** Realize your dreams
